

Helps your providers prepare for the transition to ICD-10

The Challenge of ICD-10

In 2014, the U.S. transitioned to the ICD-10 code set requiring clinicians to use the new ICD-10 code set for reimbursement from payers. This represented a major change in how clinicians document diagnoses in the medical record and how they are paid for services.

ICD-10 Readiness for the Clinician

For those clinicians who have not transitioned to ICD-10, Codewalk supports this transition through the following, Codewalk supports ICD-10 readiness plans:

- ▶ **Build an understanding for the need for specificity in the medical record**

Clinicians are required to submit reimbursement requests that are coded to the highest level of specificity supported by the medical record. The ICD-9 code set currently in use contains

approximately 17,000 codes. The ICD-10 code set is approximately 155,000 codes. Clinicians will be examining their frequently used ICD-9 codes and their ICD-10 equivalents to determine the impact in the level of specificity needed in the medical record and the increase of their coding vocabulary.

- ▶ **Codewalk includes a tool that maps ICD-9 to ICD-10 codes** and vice versa using data from the Center for Medicare & Medicaid Services.

- ▶ **Learn ICD-10 Guidelines**

Codewalk includes the ICD-10 Guidelines content Reference tool for ICD-10 coding exercises Codewalk provides support for ICD-10 training. Students can use Codewalk as a reference for completing coding exercises.

CODEWALK

Codewalk is a coding reference application targeted specifically at ICD-10. The ICD-10 code set is broad in scope and the high degree of specificity makes the code set very deep. Codewalk delivers access to the ICD-10 code set in a quick, easy to use yet powerful user interface. Features include:

- ▶ GEMs (General Equivalency Mappings between ICD-9 and ICD-10)
- ▶ Data views that facilitate the comparison of documents, codes, and search results
- ▶ Powerful search engine
- ▶ ICD-10-CM and PCS code set and guidelines
- ▶ Quickly find an ICD-10-PCS code with the ICD-10 PCS smart code builder

Value to the EHR through providing access to Codewalk

In addition to offering your providers industry leading services, you can also help them address the issue of ICD-10. Codewalk offers multiple points of value to the EHR, including:

- ▶ Demonstrate proactive support of your customers by providing ICD-10 readiness tools
- ▶ The site will be secured so only available to your licensed users
- ▶ Provide customer support in advance of having integrated ICD-10 coding solutions integrated into the EHR application
- ▶ Your providers will be directed to a customized instance of the site that will include your logo and be styled after your EHR interface
